

ESG Management at SEKISUI CHEMICAL Group

The efforts of SEKISUI CHEMICAL Group to contribute to resolving social issues directly connect to the greater sustainability of society, while the net sales gained in exchange for these contributions indicate the degree to which the Group helps resolve social issues. By raising this degree of contribution, the Group can ensure its own profitable sustainable growth and in turn enable the further expansion of its contributions to customers, shareholders, employees, business partners, local communities, the environment, and all other stakeholders.

What is “Management ability to sustain business” ?

“Efficiency”

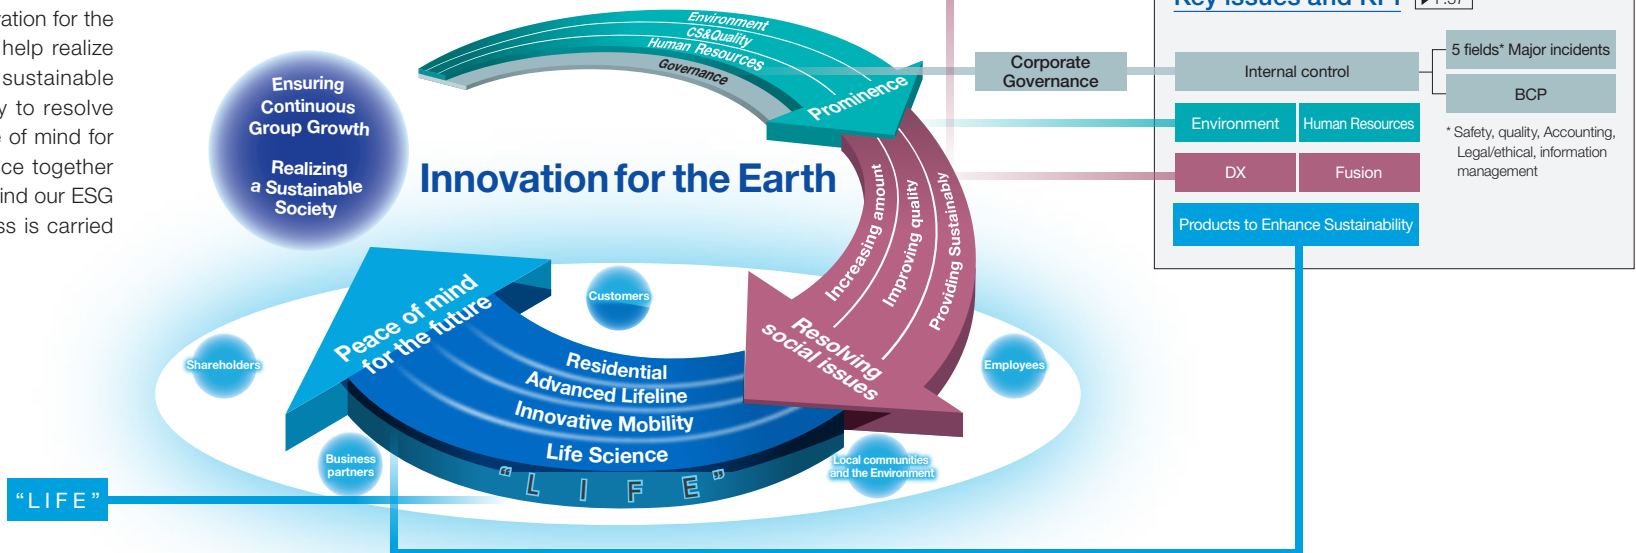

- Improve productivity and efficiency, make efficient use of management resources.

“Preparing the organization for long-term sustainability (Strengthen business base)”

- Avoidance of significant risk by thorough Safety, Compliance, and Quality.
- Investing in business base for sustainable growth, reduce various long-term capital costs.

Conceptual Diagram of ESG Management

We have positioned the statement “Innovation for the Earth” as a central theme, and we will help realize a sustainable society and the Group’s sustainable growth through our prominence, ability to resolve social issues, and efforts to bring peace of mind for the future. Putting this cycle into practice together with our stakeholders is the concept behind our ESG management. Our value creation process is carried out based on this conceptual diagram.

With a focus on four domains (business domains), we will pursue the creation of “peace of mind for the future,” which supports the basis of LIFE.
